tion of Water Supply Dam.

Special Correspondence of The Evening Star.

LAUREL, Md., April 8, 1901. A meeting of the water board for the the south of the town. The report of the regulations have something to do with it, stream being utilized by the residents of the place. With his report the chemist submitted suggestions for the proper treatment of all the land bordering the branch. sion of at least five yards on each side of the stream, so that trenches could be dug water containing, so he stated, many impurities which would render it unfit for the public use. He also suggested that the present lake into which the branch flows be drained and the bed be dredged. The land bordering this body of water is also

to be cleared of all vegetation for a dis-tance of nearly ten yards.

At this meeting it was practically decided to locate the supply dam on or near prop-erty owned by Mr. Edmund Hill, adjacent the Compton property. The pumping station will be located in the vicinity of the present electric light plant, and after the purchase of that property a general power house will be erected to furnish power for both the water and lighting systems. The standpipe will be built on the high ground in the western part of the town. The engineer for the town, a mem-ber of the firm of Allen, Hill & Quick of Baltimore, and the representative of Rosser & Castoe, the contractors, will be asked to be present at a meeting to be held at Mr. Stanley's Wednesday night, when the details can be completed for an early start on the work. The firm of Rosser & Castoe secured the contract for supthe standpipes. It is stipulated in the contract that as many of the people of the town will be employed as is compatible to the early completion of the contract. The furniture for the new Presbyterian Church of this town was received here Saturday morning. The regular influx of summer re

has already begun, several familles from the cities having moved here during the past few weeks, with the promise of many Railway Tracks at Fort Monroe. The Secretary of War has decided that

all street railways seeking entrance to the military reservation at Fort Monroe will be treated equally. If a road builds up to the present limits of the reservation, it will be entitled to reach the wharf over the tracks of the company which already have been laid, by making an equitable ar-rangement with the first company. TRADE WITH THE ISLANDS

EXPORTS TO CUBA, HAWAII AND

THE PHILIPPINES. Comparative Statement for Eight Months Ending in February

for Six Years

Exports from the United States to Porto Rico and the Philippines continue to grow. To Cuba there is no perceptible increase in 1901, compared with 1900. To Hawaii the exports are no longer recorded because of the refusal of exporters to continue their statements since the annexation of Hawaii and its establishment as a customs district of the United States. The latest figures of the treasury bureau of statistics show that the exports from the United States to Porto Rico in the eight months ending with February, 1901, were \$4,295,953, against \$2,219,-721 in the corresponding months of the preceding fiscal year, \$1,326,663 in the corresponding period ending with February, 1899, and \$1,200,067 in the corresponding period ending with February, 1898.

To the Philippines our exports in the eight months ending with February, 1901, were \$2,767.881, against \$1,701.403 in the corresponding period of the preceding fiscal year, \$117.021 in the same period of the fiscal year 1830, and \$63.235 in the same period ending with February, 1838. To Cuba our exports for the eight months ending with February of the present year were \$17,236,752, against \$17,172,472 in the corresponding period of the preceding year, \$10,142,949 in the eight months ending with February, 1893, and \$7,689,323 in

Trade With Hawaii.

not, as already indicated, be measured for the present fiscal year, but there is every reason to believe that they are increasing as are those to Porto Lico and the Philippines. In the eight months ending with February, 1900, they increased 50 per cent over the corresponding period of the pre-ceding fiscal year, and now that commerce between the islands and the United States is absolutely unrestricted it is not unreasonable to assume that the figures have materially increased.

and the Philippines in the eight months ending with February, 1901, amounted to \$24,300,536, against \$21,003,596 in the corresponding period of the fiscal year 1900, \$11,586,633 for a like period in 1899, and \$8,958,625 for a like period in the fiscal year 1898.

Could the figures of our exports to Hawall in the present fiscal year be included it is probable that the total exports from the United States to the four islands or groups of islands would amount to \$36. 000,000 in the eight months under consid eration, against \$30,000,000 in the corre-

and the Philippine islands in the eight months ending with February, in each year from 1896 to 1901:

Falling Off Causes Surprise The falling off of commerce, both to and from Cuba with the United States causes considerable surprise. The War Depart also the fact that the tobacco crop of last year, while very large, was not so good as usual, and the dealers in the United States buy only the best. But this is not re-garded as wholly explanatory, and there is an intimation that native hostility to the United States is shown in the trade rela-

tions. The trade that has fallen off with

the United States has gone largely to

Great Britain and Germany.

Keeping Out Foot and Mouth Disease. The officials of the Agricultural Department are closely watching all reports from abroad regarding the extent of the foot and mouth disease, a fatal malady that is raging among the live stock in almost every country throughout Europe. For the last three years the outbreak has been general on the European continent and the reports constantly arriving from various foreign points do not indicate any dimunition in its extent. This government, as it has done since the epidemic reached such alarming dimensions, is refusing to admit any cattle, sheep or swine, except from the British Isles. This is done not only to protect the vast live stock interof this country, but also to protect our \$30,000,000 or \$40,000,000 annual export

Discredited by Minister of Colombia.

Dr. Martinez Silva, the Colombian minis-

ter, says that he has not received any information concerning the latest reported revolutionary move in his country. He is inclined to place no credence in the report, as in his last mail from Colombia he received very assuring advices as to the

Thus the exports to these islands have trebled since February. 1898, have doubled since 1899, and have in creased 25 per cent in the past year, though to Cuba there has been in the past year no material increase. Dr. Bilva called attention to the fact that General Rafael Uribe, the acknowledged leader of the revolutionary element in Colombia, is now a fugitive in New York city, and that his latest advices from Panama stated that the guerrilla bands were fast disbanding into complete inactivity.
